

REACH Compliance Statement

This statement concerns European Union regulation 1907/2006, the Registration, Evaluation, Authorization and Restriction of Chemicals, also known as REACH. This law entered into force on 1 June 2007 and will be phased in until 2018.

Under REACH, registration is required for substances which are used in the European Community for manufacturing of articles (e.g. manufactured goods such as cars, textiles, electronic chips). Suppliers of articles must provide recipients with information on Substances of Very High Concern (SVHC) if those are present above a concentration limit of 0.1 % on an article level. None of our materials contain substances of very high concern (SVHC). Given those conditions our current products are exempt from REACH pre-registration and later registration activities.
