

IHC Antibodies Including UltraMAB®

Performance, specificity and quality are critical requirements for obtaining accurate protein detection results by IHC. SDIX has manufactured OriGene's antibodies, including UltraMAB® products, in a GMP environment and obtained CE marking for these products. The **CE mark** provides a level of quality, safety and performance to ensure product reliability and reproducibility.

OriGene UltraMAB® antibodies are highly-specific anti-human mouse monoclonal antibodies directed towards important diagnostic targets and known cancer biomarkers. These antibodies are intended for **in vitro diagnostic (IVD) use**.
